

RESEARCH, DEVELOPMENT and TECHNOLOGY TRANSFER QUARTERLY PROGRESS REPORT (QPR)

Wisconsin Department of Transportation (WisDOT)
DT1241 5/2014

INSTRUCTIONS:

Research principal investigators and/or project managers should complete a quarterly progress report (QPR) for each calendar quarter during which the projects are active.

Total Project Budget	Expenditures Current Quarter	Total Expenditures	% Funds Expended	% Work Completed
\$94,989.00	\$192.00	\$27,826.00	29%	45%

Project Description

The objective of the research is to assess the ability of the newly developed NCHRP 24-29 to characterize the scour for various types of Wisconsin bedrock at selected structures throughout the state. The study will evaluate the need to refine the test procedures and establish a range of typical values of the test parameters for Wisconsin bedrock. The research will also compare the new method to current practice and communicate the potential benefits that can be realized through WisDOT implementation.

The proposed study described hereinafter will directly follow the objectives specified in the RFP from WHP:

1. We will collect geologic and hydrologic data from selected sites in Wisconsin where bridges are founded on bedrock.
2. We will conduct field and laboratory test to establish parameters that characterize the relationships between the bedrock erosion rate and the hydraulic loading, following methods developed for the NCHRP Project 24-29.
3. We will refine the test procedure and establish models that include a range of parameters specific for Wisconsin bedrock. We will apply the new models to more accurately predict rock scour at Wisconsin bridges.
4. We will also compare the new model to current practice and communicate the potential benefits that can be realized through WisDOT implementation. Final results will be incorporated into the current WisDOT Bridge Manual with additional procedures for bridge scour analysis.

Progress This Quarter (includes meetings, work plan status, contract status, significant progress, etc.)

1. Continued literature search and review of new information on rock scour
2. Attended meeting with project team from WisDOT and finalized plan for obtaining rock samples and drilling
3. Finalized plan with Collins Engineers for channel bottom surveys on the sites of selected projects

Anticipated Work Next Quarter

1. Participate in the drilling and obtaining rock samples from selected project sites
2. Conduct surveys of channel bottom
3. Acquire and test rock samples
4. Perform data analysis

None
